Roger Bacon Mission Statement

Rooted in the Franciscan values of holiness and learning, self-discipline and compassion, Roger Bacon is a Catholic high school which develops the hearts, minds, and bodies of its young men and women in a caring and challenging environment.

Academic Programs

Roger Bacon High School offers three academic programs in order to challenge the abilities of all students. Freshman placement is determined on the basis of grades, teacher recommendations, and placement test results.

At the end of each year, teachers and the guidance staff evaluate students to ensure that they are performing at their highest potential. Adjustments are made as needed in consultation with parents.

Because students progress at different levels in different classes, it is common to be placed in more than one academic program; for example, a student may take honors level math and science and college prep level history or English.

Assisi Scholar Program

This program is designed to foster a small community of learners who take advanced courses across all subject areas. Students apply for the program at the end of their freshman year. Students enroll in honors or AP® level courses for all core subjects required for graduation by the State of Ohio (Math, Social Studies, Science, and English). These core courses must be taken on the premises of Roger Bacon High School in classes with other Assisi Scholar students, taught by faculty at Roger Bacon High School, and use the approved curriculum designed by and texts chosen by Roger Bacon instructors. Students will complete 4 credits each in English, Math, and Science; 3-4 credits in Social Studies; 3 credits of a foreign language; and quality academic electives. In addition, Assisi Scholars participate in enrichment programs, work with a faculty advisor, and present an academic Senior Capstone of their own design and implementation. Their senior year they also participate in a school sponsored pilgrimage to Assisi, Italy.

College Preparatory Program

This program is designed to meet the academic curriculum requirements for acceptance at four-year colleges and universities. Students will complete 4 credits each in English, Math, and Science; 3-4 credits in Social Studies; 2-3 credits of a foreign language; and quality academic electives. Students in this program present a Senior Capstone as a culmination of their senior service project.

College/Career Program

This program is designed to prepare students for post-secondary experiences including community colleges, the military, or other post-secondary training. Students will complete 4 credits in English and Math (including at least Algebra II); 3-4 credits in Science and Social Studies; and quality academic electives. Students in this program present a Senior Capstone as a culmination of their senior service project.

Graduation Requirements

Roger Bacon requires a minimum of 24 credits to graduate including the following courses:

- | | |
|--|--------------------------------|
| 4 credits of English | 4 credits Theology |
| 4 credits Math | 1 credit of Fine Arts |
| 3 credits Science | ½ credit of Physical Education |
| 3 credits of Social Studies including: | ½ credit of Health |
| • ½ credit of World History | |
| • 1 credit of Government | |
| • 1 credit of American History | |

The following are required for participation in graduation:

- Completing all state of Ohio Graduation Requirements – for information on graduation requirements, go to education.ohio.gov and search for “Graduation Requirements.”
- Not failing more than two classes in senior year
- Meeting all financial obligations
- Attending a senior retreat

Community Service

In an effort to make religious teachings more applicable to the real world experience of its students and to help students extend their concerns beyond their immediate area of involvement, Roger Bacon requires students to perform 20 hours of community service. This service must be completed between the summer prior to their senior year and third quarter senior year.

Grading Scale

A numeric grade is given on report cards for each quarter and each semester exam. In order to pass a subject, students must have a year-end average of 70. The grading scale is listed below:

A	100-93
B	92-85
C	84-75
D	74-70
F	69 and below

Course Sequence

Freshman Year Sequence

Honors	College Preparatory	College/Career
Honors English 9	CP English 9	English 9
Honors Algebra I <u>OR</u> Honors Geometry	CP Algebra I	Algebra I, Part I
Honors Biology	CP Biology	Integrated Science
Honors World History	CP World History	World History
Theology 9	Theology 9	Theology 9
Freshman Seminar	Freshman Seminar	Freshman Seminar
World Language	World Language	

Elective Options	Health, PE, Fine Arts electives
-------------------------	---------------------------------

Sophomore Year Sequence

Assisi Scholar	College Preparatory	College/Career
Honors English 10	CP English 10	English 10
Honors Algebra II **	CP Geometry	Algebra I, Part II
Honors Chemistry	Chemistry	Biology
AP® U.S. Government and Politics	CP U.S. Government and Politics	U.S. Government and Politics
Theology 10	Theology 10	Theology 10
World Language	World Language	World Language

Elective Options	Health, PE, Fine Arts electives
-------------------------	---------------------------------

** Students in the Assisi Scholar Program are expected to take Honors Pre-Calculus their junior year. This may require taking two math classes sophomore year, depending on their placement freshman year.

Junior Year Sequence

Assisi Scholar *	College Preparatory	College/Career
AP® Capstone: Seminar	CP English 11	English 11
Honors Pre-Calculus	CP Algebra II	Geometry
Honors Physics <u>OR</u> AP® Physics I <u>OR</u> AP® Biology <u>OR</u> AP® Chemistry	CP Physics	Materials Science
Honors U.S. History <u>OR</u> AP® U.S. History	CP American History	American History
Theology 11	Theology 11	Theology 11
World Language	World Language or electives	World Language

Elective Options	Electives in English, Science, Social Studies, or Fine Arts
-------------------------	---

* Assisi Scholars in their junior year must take AP® Capstone Seminar, Honors Pre-Calculus, and an AP® level science or social studies class.

Senior Year Sequence

Assisi Scholar **	College Preparatory	College/Career
AP® Literature (class of '22) AP® Capstone: Research (starting with the class of '23)	CP English 12	English 12
AP® Calculus AB <u>OR</u> AP® Statistics	CP Pre-Calculus or CP Probability & Statistics	Algebra II
AP® Physics I <u>OR</u> AP® Biology <u>OR</u> AP® Chemistry	Science electives	Science electives
AP® Psychology <u>OR</u> AP® World History	Social Studies electives	Social Studies electives
Theology 12	Theology 12	Theology 12
World Language or electives	World Language or electives	World Language or electives

Elective Options	Electives in English, Science, Social Studies, or Fine Arts
-------------------------	---

** Assisi Scholars in their senior year must take AP® level courses in English, math, and either science or social studies.

Academic Clusters

Electives allow students to explore different fields of interest. The following Academic Clusters are recommended for students wishing to learn more about different career paths.

Business

Publications
Graphic Design
Website Design I
Website Design II
Economics
CP Probability and Statistics
AP® Statistics

Medicine or Health Sciences

Ethics in Science
Human Biology
CP Anatomy and Physiology
AP® Biology
AP® Chemistry
AP® Psychology

Law, Advocacy, and Justice

Contemporary World Issues
AP® US Government and Politics

STEM

Engineering I
Engineering II
Robotics
3-D Design
Intro to Computer Programming
AP® Statistics
AP® Calculus AB
AP® Computer Science A

Arts

Music Production
Theater Production
Stage Acting
Stage Directing
Graphic Design
Photography
Studio Art Portfolio
AP® Art and Design

Earning College Credit

Roger Bacon currently offers opportunities for students to earn a total of **59 college credits** by taking courses on campus.

Course	AP® Credit	College Credit
AP® English Language and Composition	Yes	3 credits through Mount St. Joseph University
AP® English Literature and Composition	Yes	
AP® Calculus AB	Yes	
AP® Statistics	Yes	
AP® Computer Science A	Yes	
AP® Biology	Yes	8 credits through Mount St. Joseph University
AP® Chemistry	Yes	
AP® Physics I	Yes	
AP® US History	Yes	6 credits through Mount St. Joseph University
AP® United States Government and Politics	Yes	3 credits through Mount St. Joseph University (pending approval)
AP® Psychology	Yes	
AP® World History Modern	Yes	6 credits through Mount St. Joseph University
AP® Art and Design 2-D	Yes	
AP® Art and Design 3-D	Yes	
AP® Art and Design Drawing	Yes	
Philosophy	No	3 credits through Mount St. Joseph University
* Robotics	No	2 credits through Cincinnati State
* Engineering I	No	3 credits through Cincinnati State
* Engineering II	No	3 credits through Cincinnati State
* Website Design I	No	3 credits through Cincinnati State
* Website Design II	No	3 credits through Cincinnati State

* These courses are pending approval at the time of printing and are not included in the 59 hours currently available.

AP® Credit

Students taking AP® courses take an AP® exam at the end of the year. Students earning a 3 or higher on an AP® exam may earn college credit. Usually students earn 3 college credit, but some institutions may award up to 6 credits for an AP® score of a 4 or 5. Policies vary by institution. The exam fee is set by the College Board and was \$85 per exam in the 2019-20 school year. To find out how many credits a particular college or university will award, go to the following link:
<https://apstudent.collegeboard.org/creditandplacement/search-credit-policies>.

Early College Credit

Students taking a class approved for early college credit through Mount St. Joseph University earn college credit if they earn a grade of a C or better for the final grade in the corresponding course at Roger Bacon. Courses are taught on our campus by Roger Bacon faculty members approved by Mount St. Joseph University. The cost is \$50 per credit hour.

College Credit Plus

Students who take a course at a public Ohio college or university may be able to count the credit earned towards a high school graduation credit. Students interested must apply to the university or college and be accepted. In addition, they apply to the Ohio Department of Education for funds to cover the cost of the program. This option is free of charge to students, but funds from the state are limited, and the application is due the April prior to the year the course will be taken. More information about College Credit Plus is available at the Roger Bacon Guidance website:
<http://www.rogerbacon.org/academics/guidance-counseling/college-credit-plus>.

These notes relate to the course descriptions on the following pages:

- Each semester-long course is worth .5 credit, with the exception of Physical Education for which .25 credit is earned.
- Each year-long course is worth 1 credit.
- “TR” indicates a teacher recommendation is required for a student to sign up for a class.
- “AP®” indicates Advanced Placement® courses that have been audited and approved by the College Board. Students enrolled in AP® courses are required to take the AP® exam at the end of the year and may earn college credit depending on their score.

English Courses

Freshman Seminar

.5 Credit Semester

Freshman Seminar is a one-semester course designed to prepare all students for success in their freshman year and beyond. In a workshop environment, students will learn the following concepts and skills: iPad and SpartanLink use, study habits, notetaking, test taking, public speaking, conducting research, and communication protocols for emails, setting appointments with teachers, and social media.

Freshman Seminar - Intervention

1 credit Year

Freshman Seminar is a full year course designed to serve the specific needs of students who benefit from collaborating with an Intervention Specialist. In a small group environment, students will learn the following concepts and skills: iPad and SpartanLink use, study habits, notetaking, test taking, public speaking, conducting research, and communication protocols for emails, setting appointments with teachers, and social media. Students will benefit from working with the Intervention Specialist as they apply the seminar skills to assignments they are responsible for in their core subject areas.

Honors English 9

1 Credit Year

This course seeks to improve the writing skills of students, especially in complete compositions. It is a thorough introduction to the genres of literature and to literary analysis dealing with figurative language, themes, motifs, and style. Finally, it is designed to increase the student's vocabulary with words of moderate difficulty.

CP English 9

1 Credit Year

This course will enable students to improve their reading comprehension on many levels. Students will be encouraged to seek a personal engagement with a variety of literary and informational texts. They will write about their responses to literature as well as their own experiences. The course will include a review of parts of speech, rules of grammar, and punctuation. The course is also designed to increase a student's vocabulary with words of moderate difficulty.

English 9

1 Credit Year

This course introduces a variety of literary genres, with an emphasis on reading comprehension and an exploration of figurative language and themes. This course reinforces the elements of grammar, punctuation, and sentence structure in a variety of writing assignments. Students will also develop vocabulary and spelling skills.

Honors English 10

1 Credit Year *Pre-requisite: English 9 and TR*

This is a survey course that engages students in becoming skilled readers of prose, poetry, and informational texts written in a variety of periods, disciplines, and rhetorical contexts. As students work to become skilled writers who compose for a variety of purposes, their writing will make them more aware of the interactions among the writer's purpose, subjects, and audience expectations. The student will conduct literary research, acquire challenging vocabulary, and refine grammar to support writing.

CP English 10

1 Credit Year *Pre-requisite: English 9*

With the purpose to improve reading comprehension skills, the students will continue an examination of various genres of literature and informational text from many different countries. This course is designed to build on the rules of grammar and punctuation that were introduced during English 9 and examine writing conventions at a more complex and in-depth level. These skills will enhance the student's written expression in all areas: narrative, argumentative, and expository. The course will also increase the student's vocabulary with words of moderate difficulty.

English 10

1 Credit Year *Pre-requisite: English 9*

This course introduces a variety of literary genres from many countries with an emphasis on reading comprehension and an exploration of main ideas, themes, and figurative language. Elements of grammar, punctuation, and sentence structure are reinforced in a variety of writing assignments. Students will also expand vocabulary and improve spelling skills.

AP® Capstone: Seminar

1 Credit Year Pre-requisite: English 10 CP and TR

AP® Seminar is a foundational course that engages students in cross-curricular conversations that explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives. Students learn to investigate a problem or issue, analyze arguments, compare different perspectives, synthesize information from multiple sources, and work alone and in a group to communicate their ideas.

CP English 11

1 Credit Year Pre-requisite: English 10

This course presents an historical and critical approach to all forms of American literature through the study of complete and representative works by American authors. In addition to short stories, poetry, and nonfiction, students will read novels and dramas with an emphasis on expository writing, vocabulary study, and research.

English 11

1 Credit Year Pre-requisite: English 10

A survey of various genres in American literature, the focus of this course is three-fold: to read and understand the literature as it relates to the historical period, to refine grammar and writing skills, and to increase vocabulary.

AP® English Literature and Composition

1 Credit Year Pre-requisite: CP English 11 and TR

The AP® English Literature and Composition course is designed to engage students in the careful reading and critical analysis of British and world literature taken from multiple genres and covering the 16th – 21st centuries. Through the close reading of selected texts, students can deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. Students will be expected to analyze literature through discussion and both formal and informal writing.

**Start by doing what is necessary;
then do what is possible.
And suddenly you are doing the impossible.
~ St. Francis of Assisi**

AP® Capstone: Research (offered starting in the 2022-23 school year)

1 Credit Year Pre-requisite: AP® Capstone: Seminar and TR

AP® Research, the second course in the AP® Capstone experience, allows students to deeply explore an academic topic, problem, issue, or idea of individual interest. Students design, plan, and implement a yearlong investigation to address a research question. Through this inquiry, they further the skills they acquired in the AP® Seminar course by learning research methodology, employing ethical research practices, and accessing, analyzing, and synthesizing information. Students reflect on their skill development, document their processes, and curate the artifacts of their scholarly work through a process and reflection portfolio. The course culminates in an academic paper of 4,000–5,000 words (accompanied by a performance, exhibit, or product where applicable) and a presentation with an oral defense.

CP English 12

1 Credit Year Pre-requisite: English 11

This course is a survey of British prose and poetry from the Anglo-Saxon period through the 21st century. The purpose of the course is to read and understand fiction and nonfiction as they relate to the historical time period in which they were written. In addition to readings, 300-500 word essays will be assigned. The course aims to refine the grammar, vocabulary, and writing skills of the students.

English 12

1 Credit Year Pre-requisite: English 11

Using British literature as a foundation for continued genre study, this course continues to build reading comprehension skills. In addition, the course is designed to refine the grammar, vocabulary, and writing skills of the students.

Publications

.5 Credit Semester Pre-requisite: English 9 and TR

This course is designed to introduce students to the fundamentals of publications and journalism. The class will work together to produce the *Troubadour*, the Roger Bacon yearbook. Publications skills will include the following: computer-assisted graphics design, writing, and desktop publishing. Students may take this class more than once.

Creative Writing

.5 Credit Semester Pre-requisite: English 10 and TR

This course is devoted to developing the writing skills of the students in creative compositions and the study of both prose and poetry. In addition to exploring writing daily, students will engage in self-critique, peer-editing, and publishing.

Public Speaking – Fearless Presentations

.5 Credit Semester

Open to grades 11-12

Whether you are a reader at your church, speaking at your best friend's wedding, or delivering a presentation at college, everyone can benefit from learning to speak before a group. Lose the public speaking jitters by taking this course which is designed with two main objectives: to encourage you to express your thoughts on a variety of topics and to increase the quality of your verbal expression. You will learn to defend a position, explain a process, persuade, demonstrate, and entertain. Learning to include anecdotes and humor to speeches will delight your audience and enhance your public speaking effectiveness. Use of presentation software and visual media to support the presentation will be learned and applied to the verbal aspects of the course.

American Slang

.5 Credit Semester

Open to grades 11-12

Formal speech gives us structure, and slang adds the spice. Learn why you "boot up" a computer. Why is a "lefty" called a "southpaw"? What do the clothes you wear have to do with "speaking off the cuff"? Has a bully ever "ridden rough shod" over you causing you to want to "put up your dukes"? Do you buy "duck tape or duct tape"? When you are at *Skyline* do you order "soda" or "pop"? Learn the answers to these questions and many more when you study American Slang.

Legends and Folklore from around the World

.5 Credit Semester

Open to grades 11-12

Every culture celebrates its origin, history, famous people, monsters, and events. These short tales of lost loves, ghosts, knights, magic creatures, and creepy urban legends will take you on a trip around the world. Students will put their creative writing skills and storytelling skills to work to they create their own folktales. This one-semester class is designed to inform, amaze, and entertain.

Fine Arts Courses

Visual Arts

Intro to Studio Art

.5 Credit Semester

Intro to Studio Art is an introduction to the fundamentals of art, including elements of art and principles of design, the building blocks of all art classes. Students will explore various media through assignments that include everything from photography and printmaking to still life studies. In addition, students will learn to reflect on their own work and the work of other artists.

Drawing and Painting I

.5 Credit Semester Pre-requisite: Intro to Studio Art

Students will build on what was learned in Intro to Studio Art to hone their skills and explore the techniques associated with drawing. Students will learn to incorporate what they see and interpret that into visual design through the techniques of drawing and painting. They will further explore the critique process as well as study famous artworks to be able to learn how to pull the unspoken meaning from visual art.

Drawing and Painting II

.5 Credit Semester

Pre-requisites: Intro to Studio Art and Drawing and Painting I

Open to grades 10-12

Drawing and Painting II is a challenging class for students truly interested in fine arts. We will explore higher level drawing techniques that will transition into painting techniques and skills. Implementing the knowledge and experience from the previous courses, students work on creating truly original works of art that will prepare them for the Studio Art Portfolio course if they choose to continue. Students will learn to make choices about processes, media, and aesthetics based on their personal expression and artistic style.

3-D Art I

.5 Credit Semester Pre-requisite: Intro to Studio Art

3-D Art I applies the foundations of art learned in Intro to Studio Art to the processes, ideas, and functions of three-dimensional objects as fine arts. Technical skill, safety, and work ethic drive your creative process and grades in this course. Students' brainstorming, drawing, technical processes, and research skills will be honed and strengthened through this course. Students will be challenged with creative problems and set boundaries. By exploring a variety of artists, media and processes, students will strengthen their creative, analytic, and critical thinking skills.

3-D Art II

.5 Credit Semester Pre-requisites: Intro to Studio Art and 3-D Art I

Open to grades 10-12

3-D Art II is a challenging class for students truly interested in fine arts. Building on skills learned in Intro to Studio Art and 3-D Art I, students will explore higher level constructing and modeling techniques and skills. Implementing the knowledge and experience from the previous courses, students will be working on creating truly original works of art that will prepare them for the Studio Art Portfolio course if they choose to continue. Students will learn to make decisions about processes, media and aesthetics based on their personal expression and artistic style.

Photography I

.5 Credit Semester Pre-requisites: Intro to Studio Art and any other art elective

Open to grades 10-12

Photography I applies the foundations of art learned in Intro to Studio Art to the process, ideas, and function of photography as fine art. Technical skill, safety, and work ethic drive your creative process and grades in this course. This course will utilize the traditions of photography and the technologies of today. Students will explore composition of photography using their iPads, phones, or digital cameras. Students will reflect on their work and the work of other artists so they may learn to edit and revise their own art.

Photography II

.5 Credit Semester *Pre-requisites: Intro to Studio Art and Photography I*
Open to grades 10-12

This is a challenging class for students truly interested in fine arts. Implementing the knowledge and experience from the previous courses, students will work on creating truly original works of art that will prepare them for the Studio Art Portfolio course if they choose to continue. Students will learn to make decisions about processes, media and aesthetics based on their personal expression and artistic style.

Graphic Design

.5 Credit Semester
Pre-requisites: Intro to Studio Art, Drawing and Painting I, Photo I, and TR
Open to grades 11-12

This upper level class introduces students into the world of graphic design. Pulling upon the foundation skills learned from previous courses, students will be introduced to designing on sophisticated software as they explore higher level design principles, software techniques, and text. Students will learn to design digitally with an introduction to typefaces, fonts, and layout and production skills.

Studio Art Portfolio

1 Credit Year
Pre-requisites: Intro to Studio Art, Drawing and Painting I and II, Photography I, and TR
Open to grades 11-12

Studio Art Portfolio is an advanced level course for students who are self-motivated and seriously interested in a creative career. The course allows students to take an in-depth, mature approach to developing skills, techniques, and personal style. Students will be motivated to make their own choices about processes, media, and aesthetics based on their own expression and voice. Emphasis will be placed on creativity, originality, and authentic work. Students will critically reflect on their work and the work of other artists. Students at this point should be able to read the language of visual art and be developing their own personal vocabulary for creating art. Work created in this course must show thoughtful decision making that culminates in communicating personal expression.

AP® Art and Design

1 Credit Year

*Pre-requisites: Intro to Studio Art, Drawing and Painting I and II, Photography I, and TR
Open to grades 11-12*

AP® Art and Design is designed for students who are seriously interested in a rigorous study in art. AP® Art and Design is not based on a written exam; instead, students submit portfolios for evaluation at the end of the school year. The program consists of a choice among one of three portfolios: 2-D Design, 3-D Design, and Drawing. This course is based on students creating a body of work that demonstrates quality, concentration and breadth. As in any college level course, students will be expected to spend a considerable amount of time outside of class in order to complete assignments.

He who works with his hands is a laborer.

He who works with his hands
and his head is a craftsman.

He who works with his hands and his head
and his heart is an artist.

- St. Francis of Assisi

Performing Arts

Concert Band

1 Credit Year

The Concert Band is a performance ensemble that meets during the school day. No previous instrument experience is necessary to join. This class is for those who want to learn a wind instrument or continue study on an instrument through the preparation of concert music. The class includes many performances throughout the school year and covers several different styles of classical music.

Chamber Choir

1 Credit Year

The Chamber Choir is a full singing choral group that meets during the school day. The basic skills for proper singing - posture, breath support, tone production – are taught through individual and group work. The Chamber Choir will rehearse sacred music for each month's all-school Mass, as well as contemporary songs to help develop growing singers. Anyone interested, advanced singer or beginner, is welcome to join.

Chorale

1 credit Year Pre-requisite: TR based on audition

Roger Bacon's Chorale is a choir ensemble that meets during the school day. The repertoire includes both sacred and secular music of all periods and styles. An emphasis is placed on the performance of choral ensemble, multi-part songs. Chorale also performs several concerts throughout the school year at Roger Bacon, within the community, and at other local schools. A solo audition will be asked of you to join Chorale.

Piano I

.5 credit Semester

Piano I is for the beginner or inexperienced piano player. Students will learn the basics of music and piano performance, from simple note reading and hand placement to full accompaniment. The class will focus on the primary techniques particular to good, basic keyboard performance and piano playing.

Guitar I

.5 Credit Semester

Guitar I is for the beginner or inexperienced guitar player. Students will learn the basics of music and guitar performance, from simple chords to full accompaniment, and learn a variety of techniques and styles particular to guitar playing.

Guitar II

.5 Credit Semester Pre-requisite: Guitar I

Open to grades 10-12

Guitar II is for the experienced guitar player. Students learn advanced techniques of chord positions and scales to further their understanding of the multiple styles of the guitar. Built upon the basics learned in Guitar I, students will be able to extend their guitar playing and music understanding, from simple accompaniment to lead lines and alternate tunings.

Intro to Acting

.5 Credit Semester

This drama course is an introduction to the basics of acting. Students will be exposed to elements of public speaking, stage work, reciting lines, and the art of character study. Students will learn to reflect on their own work and the work of others, as well as begin to observe the art of professional theater acting. Students will have the opportunity to work in small group scenes and perform in the Fine Arts Center. They will be encouraged to audition for drama productions.

Stage Acting

.5 credit Semester Pre-requisite: Intro to Acting

Open to grades 10-12

This drama course builds upon the basics learned in the Intro to Acting class. Students will be exposed to more specific techniques for stage acting, reciting monologues, and deeper character study. Students will begin to critique fellow actors and continue to observe professional theater acting in the local community. Students will work in small groups to perform dramatic one-acts, perform in the Fine Arts Center, and will be required to audition for that year's drama productions.

History of Broadway

.5 Credit Semester

This course explores the creation of the Broadway musical through the history of American stage styles. We will discuss the basics of this genre and understand the many elements that go into creating a musical. This class will focus on the history, key performers, and important shows of Broadway through listening examples, performance videos, presentations, and other activities.

History of Rock

.5 Credit Semester

This course explores the creation of “Rock ‘n’ Roll” music through the history of American jazz, folk, and blues popular styles. We will discuss the basics of this genre and understand how it grew to form such a large amount of our current popular music. This class will focus on the history, key artists, and important songs of rock music through listening examples, concert examples, presentations, and other activities.

Music in Film

.5 credit Semester

Open to grades 10-12

This course explores the creation of the movie soundtrack through a look at the history of cinema and how classical music has impacted the film score. We will study the basics of soundtracks and discuss how visual storytelling is enhanced by emotional music. Students will focus on the history, key composers, and important film scores through listening examples, interviews, concert examples, presentations and other activities.

Theatre Production

.5 Credit Semester *Pre-requisite: TR*

Theatre Production explores the “behind-the-scenes” elements needed to create a dramatic production. Students will delve into stage management with a focus on the crew work of a show. With a study of lighting plots and designs, sound designs, and digital backdrops and animations, students will begin their training on the tech equipment in RB’s Fine Arts Center. The students will have hands-on experience in helping with each performance on stage. Students in this course will need to be a part of the stage crew for a Drama Guild production.

Stage Directing

.5 credit Semester *Pre-requisites: Intro to Acting, Theatre Production, and TR*

Open to grades 11-12

Building upon the skills of Theatre Production, students will continue to master the techniques that go into stage management. Stage Directing explores combining the elements of working and managing multiple groups of student workers from cast to crew, light to sound, and stage hands to costumes. Students will have hands-on experience in helping with each drama production from the beginning of its creative design process to its show night execution. There will also be the opportunity to direct your own small scale one-acts.

Music Production

.5 Credit Semester *Pre-requisites: Any two other music electives*

Open to grades 10-12

This course covers the basics of music recording and audio production technology. By using today's modern tools of home recording, students will complete projects and have hands-on experience in music making and recording. This class will also study the impact this technology has had on music as an industry and discuss the differences between digital streaming music and its hard copy analog counterpart. The course culminates with students producing, mixing, and editing their own songs with GarageBand on their iPads.

Songwriting

.5 Credit Semester

Pre-requisites: Any two other music electives and ability to play an instrument

Open to grades 11-12

This class provides an opportunity for students with a background in music to explore their creative expression by writing their own music. Students will be learning the basic skills of both chord and lyric writing. By discussing how to organize, write and arrange songs, students will be able to create catchy melodies and interesting harmonies.

Whether it is for a solo instrument or a standard singer-guitar pop song, students will be able to create and record their own music.

Music Theory

.5 Credit Semester *Pre-requisites: Any three other music electives and TR*

Open to grades 11-12

Music Theory focuses on the structure of music. Each of the elements of music is taught so that students not only become familiar with them but can work with these elements to create musical examples. From voice leading and chord progressions to complete compositions, students learn the significance of music structure as a result of the creative innovations of the composer. Students will master the skills of reading, writing, playing and singing music at its foundations.

Health & Physical Education Courses

Health

.5 Credits Semester

This course covers many topics including making healthy choices, managing stress, pregnancy and birth, food and nutrition, movement and coordination, personal care, prevention of drug, alcohol, and tobacco abuse, and first aid and C.P.R.

Physical Education

.25 Credits Semester

This course is designed to promote a sense of health, fitness, recreation, and a personal responsibility in being fit. Students are exposed to a variety of lifetime activities aimed at achieving a basic level of fitness including general physical conditioning, physical fitness testing, and various individual and team activities. The course involves activity and lecture. Weight training is also introduced as a method of fitness for life.

** This course will meet physical education requirements. However, a waiver of the requirement for Physical Education can be granted if a student completes two full seasons as a participant on an OHSAA approved inter-scholastic sports team.*

A sound mind in a sound body

Mathematics Courses

Honors Algebra 1

1 Credit Year

This rigorous course explores four main topics in Algebra: solving one and two variable equations, using and interpreting linear functions, factoring and quadratics, and exponentials and polynomials. Specifically, this course investigates the topics of linear and quadratic functions and their graphs, factoring and solving polynomial equations, solving systems of equations, as well as inductive and deductive reasoning. Real-world applications that can be modeled by linear and quadratic functions will be covered. In depth word problems will be addressed that require students to demonstrate an understanding of the concepts covered. Students will explore algebraic functions and concepts through the use of graphing calculators and other graphing software.

CP Algebra I

1 Credit Year

This is a college preparatory course for freshmen with the aim of developing well prepared, confident problem solvers. Starting with the basic algebraic premise of solving for “unknowns,” students will also explore rational and irrational numbers, functions, linear equations as well as patterns and sequences. All Algebra I students will be introduced to and required to manipulate monomial and polynomial expressions, including quadratic equations and functions. Students will engage in in-depth problem solving, aimed at developing critical thinking skills needed to succeed in the 21st century. Students will explore algebraic functions and concepts through the use of graphing calculators and other graphing software.

Algebra I, Part I

1 Credit Year

This is the first part of a two year fundamental algebra course designed for incoming freshman who benefit from small class sizes offering individualized instruction. This class works to develop a strong foundation of mathematical skills by reviewing many of the concepts of 8th grade math. The course will cover basic computational skills, fundamental mathematical skills, rational numbers, the solving and graphing of linear equations, proportional reasoning and applying algebraic properties. The class is designed to challenge students with a modified course while providing individual and collaborative support to allow students to be successful. Students will be given extensive support as they work to write equations and solve basic real-world problems.

Algebra I, Part II

1 Credit Year

Pre-requisite: Algebra I, Part I

This course completes the objectives of basic algebraic principles for sophomore students. This class will continue to provide individualized support while challenging students to make connections from previous concepts to the new topics of operations of polynomials, factoring, solving and graphing quadratic equations, and radical expressions. After completion the students will have a comprehensive background of Algebra I.

Honors Geometry

1 Credit Year

Pre-requisite: Algebra I and TR OR a score of 3 or higher on the Algebra I Ohio State Test

Students will study geometry as a mathematical system through the deductive development of relationships in the plane and in space. Topics covered in this course include congruence and similarity of polygons, properties of parallel and perpendicular lines, angle measures, transformations, geometric constructions, circles, and volume and area. Logic is a driving force behind all that is studied in this course as students learn to explore various concepts through geometric proof. The resources used to accomplish the objectives of the course include protractor, compass, graphing calculator, and other computer programs that demonstrate the components of geometry.

CP Geometry

1 Credit Year

Pre-requisite: Algebra I

Students will study geometry as a mathematical system through the deductive development of relationships in the plane and in space. Topics covered in this course include congruence and similarity of polygons, properties of parallel and perpendicular lines, angle measures, transformations, geometric constructions, circles, and volume and area. Logic is a driving force behind all that is studied in this course as students learn to explore various concepts through geometric proof.

Geometry

1 Credit Year

Pre-requisite: Algebra I

Students will use geometry with algebra to find distances, angle measures, areas, and volumes. They will use theorems and postulates for parallel and perpendicular lines as they apply to polygons and circles. Students will also problem solve using the Pythagorean Theorem and basic right triangle trigonometry.

Honors Algebra II

1 Credit Year *Pre-requisite: Algebra I and TR*

Honors Algebra II continues and broadens the exploration of Algebra I. Incorporating the latest in graphic calculator technology and using high level problem solving techniques, students will explore rational, irrational and complex numbers.

Specifically, this course will develop an understanding of functions as they relate to linear relations, quadratics, polynomials, and radicals. Exponentials, logarithms, sequences, and matrices will also be covered.

CP Algebra II

1 Credit Year *Pre-requisite: Algebra I*

CP Algebra II continues and broadens the exploration of Algebra I. Incorporating the latest in graphic calculator technology and using problem solving techniques, students will explore rational, irrational and complex numbers. Specifically, this course will develop an understanding of functions as they relate to linear relations, quadratic and polynomial equations. Additional topics include logarithms, sequences, exponentials, and matrices.

Algebra II

1 Credit Year *Pre-requisite: Algebra I*

Algebra II continues and broadens the exploration of Algebra I. Incorporating the latest in graphic calculator technology and using problem solving techniques, students will explore rational, irrational and complex numbers. Specifically, this course will develop an understanding of functions as they relate to linear relations, quadratic and exponential equations.

Honors Pre-Calculus

1 Credit Year *Pre-requisites: Geometry, Algebra II, and TR*

This Pre-Calculus course is designed to prepare students for AP[®] Calculus, AP[®] Statistics, or college level math courses. The course examines advanced mathematical concepts graphically, numerically, algebraically, and geometrically. Topics covered in detail include early and transcendental functions, analytic geometry and plane figures, alternate coordinate systems, probability and counting, statistical reasoning, and an introduction to limits, continuity and beginning Calculus concepts.

For the things of this world cannot be known
without a knowledge of mathematics.

- Friar Roger Bacon

CP Pre-calculus

1 Credit Year *Pre-requisite: Geometry and Algebra II*

The course examines advanced mathematical concepts graphically, numerically, algebraically and geometrically. Topics covered include early and transcendental functions, analytic geometry and plane figures, alternate coordinate systems, probability and counting, statistical reasoning, and an introduction to limits, continuity and beginning Calculus concepts.

CP Probability and Statistics

1 Credit Year *Pre-requisite: Geometry and Algebra II*

This course is aimed at those students interested in pursuing a career in business. Beginning with an introduction of simple and compound probability, this course will explore and expand the students' understanding of statistical data and analysis. Students will analyze strategies and, using probability concepts, will interpret, manipulate and create relevant statistical data in the exploration of means and standard deviations. Students will use calculators, spreadsheets and tables to estimate areas under the normal distribution curve and apply these techniques within a business model.

AP[®] Statistics

1 Credit Year *Pre-requisite: Algebra II or Pre-Calculus, and TR*

The AP[®] Statistics course is equivalent to a one-semester, introductory, non-calculus-based college course in statistics. The course introduces students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. There are four themes in the AP[®] Statistics course: exploring data, sampling and experimentation, anticipating patterns, and statistical inference. Students use technology, investigations, problem solving, and writing as they build conceptual understanding.

AP[®] Calculus AB

1 Credit Year *Pre-requisite: Honors Pre-Calculus*

This course investigates topics in differential and integral calculus, including limits and continuity, differential calculus, and definite and indefinite integration. Emphasis will be placed on transcendental functions and techniques of integration. Students will also study the concepts of calculus analytically, numerically, graphically, and conceptually. Technology will be integrated into the course through the use of graphing calculators and dynamic graphing programs. Connections and applications to various disciplines, especially physics and economics, are investigated at length.

Science and Technology Courses

Honors Biology

1 Credit Year

This course investigates the composition, diversity, complexity, and interconnectedness of life on Earth. Fundamental concepts of heredity and evolution provide a framework through inquiry-based instruction to explore the living world, the physical environment, and the interactions within and between them. Quarterly projects will be a part of this course.

CP Biology

1 Credit Year

This course investigates the composition, diversity, complexity, and interconnectedness of life on Earth. Fundamental concepts of heredity and evolution provide a framework through inquiry-based instruction to explore the living world, the physical environment, and the interactions within and between them. Quarterly projects will be a part of this course.

Biology

1 Credit Year

This course investigates the composition, diversity, complexity, and interconnectedness of life on Earth. Fundamental concepts of heredity and evolution provide a framework through inquiry-based instruction to explore the living world, the physical environment, and the interactions within and between them. Quarterly projects will be a part of this course.

Integrated Science

1 Credit Year

This introductory course is designed to allow students to explore the fundamental concepts of science skills, chemistry, and biology, including scientific notation, metric conversion, scientific method, graphing, and lab techniques. Students will explore the relationships between science and everyday life. Inquiry labs, hands-on activities, and dissection will be a part of the curriculum. Emphasis will be placed upon the Ohio Learning Standards, Science/Grade Level Expectations, and 21st Century learning skills.

Honors Chemistry

1 Credit Year

Pre-requisite: Honors Biology

This course includes atomic theory and history, atomic bonding, the periodic table, chemical nomenclature, ionic charge and oxidation numbers, chemical/physical changes, chemical equations, molar conversions, stoichiometry, phases of matter, gas laws, solubility, acids and bases, and nuclear chemistry. There is extensive lab work to support and illustrate information presented in lecture.

CP Chemistry

1 Credit Year

Pre-requisites: CP Biology and Algebra I

This course includes atomic theory and history, atomic bonding, the periodic table, chemical nomenclature, ionic charge and oxidation numbers, chemical/physical changes, chemical equations, molar conversions, stoichiometry, phases of matter, gas laws, solubility, acids and bases, and nuclear chemistry. Lab work and demonstrations give students hands-on experience.

Materials Science

1 Credit Year

Pre-requisite: Biology

Materials science is a discipline that links applied chemistry directly to useful products. The content of the course introduces some basic chemistry concepts but focuses mostly on content in the areas of solids, metals, polymers, ceramics and glasses, composites, electronic materials, and nanotechnology. The content of the course has been developed with materials and support from ASM International, one of the largest technological and scientific communities focusing on metals, polymers, and ceramics. Lab work and demonstrations are included.

AP[®] Physics I

1 Credit Year

Pre-requisites: Honors/CP Chemistry and TR

This class is designed for students who wish to investigate physical laws and theories, relationships of physical phenomena, and the interrelationships of physics to other fields. AP[®] Physics I will familiarize students with the principles of mechanics, electricity and magnetism, waves and optics. It will show the value of experimentation and mathematics in the development of laws and theories in physics and teach the basic skills of problem-solving and scientific thinking in the area of physics. The mathematical emphasis of this course prepares students for college level physics.

Honors Physics

1 Credit Year

Pre-requisites: Honors/CP Chemistry and TR

This class is designed for students who wish to investigate physical laws and theories, relationships of physical phenomena, and the interrelationships of physics to other fields. Honors Physics will familiarize students with the principles of mechanics, electricity and magnetism, waves and optics. It will show the value of experimentation and mathematics in the development of laws and theories in physics and teach the basic skills of problem-solving and scientific thinking in the area of physics. The mathematical emphasis of this course prepares students for college level physics.

CP Physics

1 Credit Year

Pre-requisite: CP Chemistry, Algebra I, and Geometry

This course investigates physical laws and theories, relationships of physical phenomena, and the connections between physics and other fields. It will familiarize students with the principles of mechanics, electricity and magnetism, waves and optics. Demonstrations and labs will be incorporated to reinforce understanding. The class will focus on the conceptual understanding of physics with mathematical applications.

AP[®] Biology

1 Credit Year

Pre-requisites: Honors/CP Chemistry and TR

AP[®] Biology is a second year course in Biology and covers molecules and cells, heredity and evolution, and organisms and populations. Laboratory experience is an essential part of the curriculum. Early College Credit is available through Mount St. Joseph University.

AP[®] Chemistry

1 Credit Year

Pre-requisites: Honors/CP Chemistry and TR

AP[®] Chemistry reviews all basic concepts in chemistry, focusing on more in-depth investigation of atomic theory, atomic structure, chemical bonding, chemical equilibria, stoichiometry, electrochemistry, acid/base chemistry, redox reactions, solubility, gas laws, chemical thermodynamics, organic chemistry, nuclear chemistry, reaction prediction, chemical nomenclature, and VSEPR theory. Extensive lab work supports and illustrates information presented in class.

CP Anatomy & Physiology

1 Credit Year *Pre-requisite: "B" or better in Biology and Chemistry*

Open to grades 11-12

The Anatomy & Physiology course is designed for students who are considering a career in the health fields or are curious about how the body works. Anatomy covers the structures within the body, while physiology covers the functions of those structures. The class includes dissections, group activities, lab activities, lecture, and class discussion.

Human Biology

1 credit Year

Open to grades 11-12

The Human Biology course is for students who are interested in how the body works or are looking at a career in the allied health fields. It will take a broad overview of the systems of the body and how they are interconnected, as well as an in depth review of biology topics. The class will include dissections, group activities, lab activities, lecture, and class discussion.

Vertebrate Zoology

.5 Credit Semester

Open to grades 11-12

Vertebrate Zoology is a semester-long survey course of the vertebrates in the animal kingdom. Animal characteristics, classification, anatomy, behavior, and development are the major topics that will be discussed. The topics covered include the vertebrate chordates: Osteichthyes, Chondrichthyes, Agnatha, Amphibia, Reptilia, Aves, and Mammalia. The class will include labs, hands-on activities, dissections, class discussion, projects, and lecture.

Biodiversity

.5 Credit Semester *Pre-requisite: Biology*

This class will investigate the source of biological diversity and interspecies dynamics in a wide variety of biomes. Students will investigate the effect of various biotic and abiotic influences, including interspecies relationships and human influences on the fitness of individual species. They will further analyze the ecological impact of species on their own habitats. Students who complete this class will acquire a comprehensive understanding of the importance of biodiversity on the health of ecosystems.

Astronomy

.5 Credit Semester

Open to grades 11-12

This course is a scientific exploration of the human place in the universe. Astronomy covers the origin and history of the Universe and the formation of the Earth and the solar system. It also compares the Earth's properties with those of the other planets and explores how the heavens have influenced human thought and action. This course includes study of the properties of light and matter and the tools astronomers use to measure radiation from celestial sources. The course also covers exciting contemporary topics such as black holes, the expansion of the universe, and the search for extraterrestrial life. Although largely descriptive, the course will occasionally require the use of basic mathematics.

Ethics in Science

.5 Credit Semester

Open to grades 11-12

The purpose of this course is to engage students in reading about, considering, and discussing the responsible conduct of science. Student objectives will include learning the purpose and value of ethical decision-making, having a positive disposition toward continued learning about research ethics, and investigating current science situations.

*THE STRONGEST ARGUMENTS
PROVE NOTHING
SO LONG AS THE CONCLUSIONS ARE
NOT VERIFIED BY EXPERIENCE.
EXPERIMENTAL SCIENCE IS THE
QUEEN OF SCIENCES AND THE GOAL
OF ALL SPECULATION.
- FRIAR ROGER BACON*

AP® Computer Science A

1 Credit Year *Pre-requisite: Algebra II and TR*

Open to grades 11-12

AP® Computer Science A is an introductory college-level computer science course. Students cultivate their understanding of coding through analyzing, writing, and testing code as they explore concepts like modularity, variables, and control structures. The host language for the class is Java. It is open to juniors and seniors who have completed Algebra II, have demonstrated math and writing skills adequate for the course, and have the teacher's recommendation.

Introduction to Computer Programming

.5 Credit Semester

This course is an introduction to basic concepts of structured programming. The programming language used in this course is C++. The class is open to all students.

3-D Design

.5 Credit Semester

Open to grades 11-12

In this guided, project based class, students will learn to design objects in 3-D design software and have the opportunity to print them with a 3-D printer. Students will be expected to create at least four designs each quarter. Designs will start at a basic level and will progress to more detail oriented projects.

Robotics

.5 Credit Semester *Pre-requisite: Geometry*

Open to grades 11-12

This hands-on, interactive semester course is for students interested in building and programming robots. Students will learn about programming, motors, servos, and sensors, ultimately creating both user controlled and autonomous robots.

Engineering I

.5 Credit Semester *Pre-requisite: Geometry*

Open to grades 11-12

This course describes the field of engineering and engineering technology, allowing students to explore technology systems and design processes. Through the course students will use math, science, technology, and writing to solve engineering problems. The course is primarily project-based also emphasizes teamwork, oral and written communication, and the impact technology has on society. This is the first course in a two semester sequence.

Engineering II

.5 Credit Semester Pre-requisite: Geometry and Engineering I

Open to grades 11-12

This is a continuation of Engineering I. The course describes the field of engineering and engineering technology, allowing students to explore technology systems and design processes. Through the course students will use math, science, technology, and writing to solve engineering problems. The course is primarily project-based emphasizes teamwork, oral and written communication, and the impact technology has on society.

Website Design I

.5 Credit Semester

Website Design I focuses on how to develop websites using HTML5 and CSS styling. Students will develop webpages with elements such as images, audio, and video. This course does not include programming.

Website Design II

.5 Credit Semester Pre-requisite: Website Design I and TR

Website Design II focuses on programming languages that support and build upon the knowledge acquired in Website Design I. Students will use “client side” Javascript to create website animation and response to user input and “server side” PHP for form processing, web security, and database access.

Social Studies Courses

Honors World History

.5 Credit Semester

This course traces the development of humanity from the Enlightenment to the present day. Emphasis is placed upon the political, economic, and social development of the various civilizations, especially those comprising our Western heritage. The course will include a strong emphasis on writing.

CP World History

.5 Credit Semester

This course traces the development of humanity from the Enlightenment to the present day. Emphasis is placed upon the political, economic, and social development of the various civilizations, especially those comprising our Western heritage. The course will include a strong emphasis on writing.

World History

.5 Credit Semester

This course traces the development of humanity from the Enlightenment to the present day. Emphasis is placed upon the political, economic, and social development of the various civilizations, especially those comprising our Western heritage. This course will emphasize writing while also emphasizing basic social studies skills.

AP® United States Government and Politics

1 Credit Year Pre-requisites: World History and TR

This course will challenge students to take an analytical perspective on government and politics in the United States. This course includes both the study of general concepts used to interpret U.S. government and politics and the analysis of specific examples. It also requires familiarity with the various institutions, groups, beliefs, and ideas that constitute U.S. government and politics. Students will become acquainted with the variety of theoretical perspectives and explanations for various behaviors and outcomes, as well as basic concepts of personal financial literacy. The course will also prepare students to take the AP® United States Government and Politics exam.

CP United States Government and Politics

1 Credit Year *Pre-requisite: World History*

This course is an examination of the structure and workings of the government of the United States. It is designed to educate students about the history of the American government, federalism, the Bill of Rights, the three branches of government, and important documents such as the Declaration of Independence and the Constitution. Students will also examine rulings of the U.S. Supreme Court, analyze political cartoons, and explicate articles concerning government issues. Students will examine state and local government as well as basic concepts of personal financial literacy. This class will include a strong emphasis on writing.

United States Government and Politics

1 Credit Year *Pre-requisite: World History*

This course is an examination of the structure and workings of the government of the United States. It is designed to educate students about the history of the American government, federalism, the Bill of Rights, the three branches of government, and important documents such as the Declaration of Independence and the Constitution. Students will examine state and local government as well as basic concepts of personal financial literacy.

AP® United States History

1 Credit Year

Pre-requisites: AP® United States Government and Politics and TR

AP® United States History is a challenging course designed to provide students with the analytic skills and factual knowledge necessary to deal critically with the problems and materials in United States history. It is a year-long survey course of American history, from the Pre-Columbian era to the present. Solid reading and writing skills, along with a willingness to devote considerable time to homework and study, are necessary to succeed. Emphasis is placed on critical and evaluative thinking skills, essay writing, interpretation of original documents, and historiography. Early College Credit is available through Mount St. Joseph University.

Honors American History

1 Credit Year

Pre-requisites: AP® or CP United States Government and Politics and TR

This course will examine American civilization from the first settlers to the present day with a focus on the central themes and issues in the development of American growth, institutional change, cultural development, and political democracy as Americans faced them in the past, and how that impacts people today and the future. With a focus on learning and applying historical thinking skills, Honors American History is a challenging course designed to provide students with the analytical skills and factual knowledge necessary to deal critically with the problems and materials in United States history. Students will not be eligible for the AP® exam.

CP American History

1 Credit Year

Pre-requisite: United States Government and Politics

CP American History is an introduction to American civilization from the age of exploration and colonization through late twentieth century American history. The course focuses on central themes and issues in the development of American growth, institutional change, cultural development, and political democracy as Americans faced them in the past. The class will include a strong emphasis on writing.

American History

1 Credit Year

Pre-requisite: United States Government and Politics

American History is an introduction to American civilization from the age of exploration and colonization through late twentieth century American history. The course focuses on central themes and issues in the development of American growth, institutional change, cultural development, and political democracy as Americans faced them in the past.

Economics

.5 Credit Semester

Open to grades 11-12

The goal of this one-semester class is to teach students financial literacy skills. The course explains microeconomics and supply and demand in terms of the choices made by individual consumers and producers in the marketplace. Students will also learn about macroeconomics in terms of the choices made by the whole economy, as reflected in aggregate demand and supply. Topics explored include GDP, unemployment, inflation, the money supply, the banking system, and monetary, tax and fiscal policy.

Contemporary World Issues

.5 credit Semester

Open to Grades 11-12

This project based course will help students explore world issues of political, environmental and economic importance. Students will develop an understanding of how the world is organized and interconnected and the possibilities and constraints facing its peoples. As a result, students will explore the relationship between a Catholic understanding and core Franciscan values and their responsibilities as citizens of the world. Students will help choose and evaluate each issue and propose personal questions and solutions.

AP® World History: Modern

1 Credit Year *Pre-requisite: TR*

AP World History: Modern is an introductory college-level modern world history course. Students cultivate their understanding of world history from c. 1200 CE to the present through analyzing historical sources and learning to make connections and craft historical arguments as they explore concepts like humans and the environment, cultural developments and interactions, governance, economic systems, social interactions and organization, and technology and innovation. Early College Credit is available through Mount St. Joseph University.

AP® Psychology

1 Credit Year *Pre-requisites: TR, open to grades 11-12*

The AP® Psychology course introduces students to the systematic and scientific study of human behavior and mental processes. While considering the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with such topics as the biological bases of behavior, sensation and perception, learning and cognition, motivation, developmental psychology, testing and individual differences, treatment of abnormal behavior, and social psychology. Throughout the course, students employ psychological research methods, including ethical considerations, as they use the scientific method, analyze bias, evaluate claims and evidence, and effectively communicate ideas.

Psychology I

.5 Credit Semester

Open to grades 11-12

Psychology I is a survey course that provides an overview of the scientific study of the human mind, its functions, and resulting human behavior. Central themes of the course include the history of psychology, methodology, motivation, emotion, the life span, theories of personality, the cognitive process, sensation, body and behavior.

CP Psychology II

.5 Credit Semester *Pre-requisites: Psychology I and TR*

Open to grades 11-12

CP Psychology II is a course for students who desire more insight into the field of psychology. Central themes of the course include the principles of learning, abnormal behavior, personality, states of consciousness, therapies, group and social forces on behavior, and careers in psychology.

Cincinnati History

.5 Credit Semester

Open to grades 11-12

Cincinnati has a rich history and culture. This course will present students with the opportunity to research, study, and present information about various people, places, and events associated with the "Queen City." After a general survey of introductory presentations and facts about related topics, students will be expected to do further research and make appropriate in-depth presentations.

The Vietnam War: American History, Society, and Literature

.5 Credit Semester

Open to grades 11-12

This one-semester elective course for seniors and juniors will be an analytical examination of the American involvement in the Vietnam War and the war's effect on American literature and society.

Civil War

.5 Credit Semester

Open to grades 11-12

This one-semester elective course analytically examines the causes of the Civil War, the events of the war, and the aftermath of the war. Particular attention is paid to the issues of sectionalism and slavery, the strategies and tactics of the war itself, and the difficult period of Reconstruction which followed.

Modern Terrorism

.5 Credit Semester

Open to grades 11-12

Students will explore themes of terrorism from circa 1900 to the present day with an emphasis on September 11th. Students will analyze events using both primary and secondary sources to evaluate meaning and significance while judging how both are constantly evolving.

Theology Courses

Theology 9: Franciscan Course, Personal Identity, and Understanding Catholicism

.5 Credit Semester

This course begins with an understanding of our Franciscan heritage. It then addresses the intellectual, emotional, and spiritual development of the freshman student, with a special emphasis on student identity and sexuality. Finally, it gives a general introduction to the development of faith according to the Christian tradition from a Roman Catholic perspective.

Theology 9: Old Testament

.5 Credit Semester

This course is a survey of the Old Testament. It begins by teaching the student how to read, understand and apply a Biblical text. It then studies the various books of the Old Testament, with special emphasis placed on the Torah. The historical and prophetic books as well as the various types of wisdom literature are also covered.

Theology 10: Christology

.5 Credit Semester

This course explores the person and the message of Jesus as found in the Catechism of the Catholic Church. The background, major themes, and content of each gospel are discussed. Special emphasis is placed on calling the student to live the Gospel message.

Theology 10: Ecclesiology

.5 Credit Semester

This course examines the nature and role of the Church with a particular emphasis are the four marks: one, holy, catholic, and apostolic. The focus throughout this dogmatic study is understanding the involvement of humanity in God's plan of salvation. This course will also outline the development of Christianity, and particularly Roman Catholicism, from its Judaic origins through the major historical periods of the Church.

Theology 11: Christian Morality and Social Justice

1 Credit Year

This course examines various methods of making moral decisions and the core concepts of conscience, sin, freedom, law, and dignity. The student then is called to apply these to Christian life.

Theology 12: Call to Holiness

.5 Credit Semester

This course challenges each person to understand the universal call to holiness. It focuses on sexuality, love, and interpersonal relationships in light of the Gospels. It emphasizes the individual call to single, married, religious, or ordained life.

Theology 12: World Religions

.5 Credit Semester

This course begins by defining what “religion” is, how “religious awareness” has developed and is still developing, and how religion continues to be an important aspect of our world. The course introduces the concept of cultural/religious pluralism in order to encourage appreciation, cooperation and peace among all of the world’s cultures, nations, and religions.

*If you learn everything except Christ, you learn nothing.
If you learn nothing except Christ, you learn everything.
~ St. Bonaventure*

Philosophy

.5 credit Semester

Open to grades 11-12

This course is an introductory exploration of the study of philosophy, or how one thinks or understands the world. Students will be able to identify important questions in the western philosophical tradition through a Catholic understanding. Students will be able to explain classic philosophical arguments proposed by ancient, medieval, and modern philosophers. Students will also be able to develop their own critical understanding of philosophical problems and arguments. Early College Credit is available through Mount St. Joseph University.

Franciscan Spirituality: Seeing the World Differently

.5 credit Semester

Open to grades 10-12

This course explores why Franciscans see the world differently – from nature to people, from labor to recreation. Rooted in the spirituality of Saint Francis and Saint Clare of Assisi, one can live the Franciscan values in the world whether in college or one’s career, as a single person or married couple. Modeled as a seminar style course with strong reflection and faith-sharing, this course places particular focus on developing a spirit of prayer, growing in fraternity, living with humility, and committing to service and ongoing learning.

Grief and Hope

.5 credit Semester

Open to grades 10-12

This course explores the complexity of death through the lens of the Catholic faith, emphasizing the importance of the Paschal Mystery for the journey of grief toward hope. Emphasis is placed on the importance of finding hope through experiences of suffering and death. The course includes a study of some of the physical, philosophical, personal, psychological, cultural, historical and religious aspects of “suffering and death” (causes of grief). This course will also provide students with prayer experiences that help to foster a dialogue with God in the midst of grief, in an effort to embrace and live a life of hope.

Prayer and Spirituality

.5 credit Semester

Open to grades 10-12

Rooted in Scripture, this course explores the sacred in everyday life and will assist the students in discovering that faith helps them become aware of God’s divine, loving presence in their everyday lives. Students will explore the wonderful legacy of prayer from the Catholic tradition, learning the significance of prayers of petition, prayers of praise, prayers of thanksgiving, and liturgical feast day prayers.

Let’s Change the World: Service-Learning in Your Community

.5 credit Semester

Open to grades 11-12

This course will engage students to explore how service can change the world on both the local level and the global level. A focus of academic study centers around bi-weekly service engagements at Cincinnati non-profit agencies at large with reflection on personal and community impact. Students will examine the root causes of social needs and understand a faith based motivation on how to serve those in need. Students will also explore post high school opportunities to continue to serve those in need.

Theology and Literature

.5 Credit Semester

This course explores the relationship between the Bible and the literary stories it has inspired throughout the centuries. Students will examine various Biblical passages while entering into the narratives described, seeking to not only know the passages more deeply but to also appreciate them on a more personal, intimate level. Time will also be devoted to reading and discussing various literary examples of “biblical theology” in which authors utilize Biblical passages and imagination to vividly retell stories from a unique cultural and literary perspective.

World Language Courses

Scope and Sequence of Courses

Our world language program is structured around the five goal areas highlighted by the American Council on the Teaching of Foreign Languages (ACTFL): communication, cultures, connections, comparisons, and communities. World language courses place special emphasis on giving students the tools they need to use the language, by mastering interpretive, interpersonal, and presentational communication skills. The following yearly structure applies to our three world languages: Spanish, French, and Latin.

- | | |
|---------------|--|
| Year 1 | Introduces students to the basic vocabulary and grammatical structures of the target language. Students will also receive a basic introduction to the culture of countries where the target language is spoken. (Proficiency target: Novice-Mid) |
| Year 2 | Develops more complex structures of the language and expands the cultural themes. (Proficiency target: Novice-High) |
| Year 3 | Completes the basic grammatical structures and places additional emphasis on higher-level communication including interpreting the literature of the target language. (Proficiency target: Intermediate-Low) |
| Year 4 | Provides in-depth study of literature and civilization with a review of structures. (Proficiency target: Intermediate-Mid) |

*Knowledge of languages
is the doorway to wisdom.*

- Friar Roger Bacon

French I

1 Credit Year

French I is an introduction to contemporary French, aimed at providing the student with an ability to understand the basics of the language, to pronounce it in a manner acceptable to native speakers, and to read, write, and spell the fundamentals. In addition, students are introduced to France and French speaking countries around the world through the study of geography, cultural centers, history, daily living, and current events.

French II

1 Credit Year *Pre-requisite: French I and TR*

French II is a continuation and deepening of the four basic skills of the French language: listening comprehension, speaking, reading, and writing. Student activities in French II emphasize more advanced communication skills and language structures and a continuation of vocabulary acquisition and cultural analysis. Students develop their cultural understanding of France and francophone cultures.

CP French III

1 Credit Year *Pre-requisite: French II and TR*

Student activities in French III emphasize more communication and conversation skills and language structures. Vocabulary acquisition is continued as well as cultural analysis. Students are required to develop the four skills of communication with guided practice in conversation, listening comprehension, advanced reading, and writing drills.

CP French IV

1 Credit Year *Pre-requisite: CP French III and TR*

This course delves more deeply into French culture and language usage. Students continue to develop the four skills of communication, with an emphasis on writing and speaking while we study the history and culture of France. Literature, art, and an in-depth review of grammar structures are fully integrated into this curriculum, with the goal of preparing the students for university language placement exams.

Spanish I

1 Credit Year

Spanish I is a course designed to introduce basic concepts of the language with emphasis on grammar, listening, reading, writing, translating, and speaking skills. Hispanic culture will also be introduced through projects and videos.

Spanish II

1 Credit Year *Pre-requisite: Spanish I and TR*

Spanish II is an intermediate course focused on conversation and a continued concentration on grammar, listening, reading, writing, translating, and speaking skills. A research project on Hispanic culture and civilization is required.

CP Spanish III

1 Credit Year *Pre-requisite: Spanish II and TR*

Student activities in Spanish III emphasize advanced communication and conversation skills and language structures. Vocabulary acquisition is continued. Students are required to develop the four skills of communication with guided practice in conversation, listening comprehension, advanced reading and writing drills. Students are exposed to Spanish civilization and culture by way of writers, poets, artists, musicians, composers, singers, and the saints.

CP Spanish IV

1 Credit Year *Pre-requisite: CP Spanish III and TR*

Student activities in Spanish IV emphasize much more advanced communication and conversation skills and language structures. Vocabulary acquisition is continued. Students are required to develop the four skills of communication with guided practice in conversation, listening comprehension, advanced reading, and writing drills.

Latin Prose

1 Credit Year *Pre-requisite: Latin II and TR*

Latin Prose gives students experience translating unadapted prose texts from classical authors including Caesar and Cicero. The course will cover advanced grammatical concepts as well as prose conventions and rhetorical devices of Latin prose. Students will also receive an overview of the history of the Roman Republic and Empire, focusing especially on the context of the works being translated. At the end of the third quarter, students will take the National Latin Prose Exam for year 3 or 4.

Latin Poetry

1 Credit Year *Pre-requisite: Latin II and TR*

Latin Poetry gives students experience translating unadapted poems from classical authors including Virgil and Ovid. The course will cover advanced grammatical concepts as well as meter, conventions, and poetic devices of Latin poetry. Students will also receive an overview of the history of the Roman Republic and Empire, focusing especially on the context of the works being translated. At the end of the third quarter, students will take the National Latin Poetry Exam for year 3 or 4.

Blessing of St. Francis

The Lord bless you
and keep you.
May He show His face to you
and have mercy.
May He turn
His countenance to you
and give you peace.
The Lord bless you!
